

HOW TO BET ON HOCKEY

PLAYERS**EDGE**

PLAYING THE GAME

To bet on hockey, tell the ticket writer the betting number of the team you wish to bet and the amount you wish to wager. If your team covers the goal spread (puck line), you win. The payout is based on a "Money Line."

Money Line or Straight Up: To understand the odds for a game based on \$1 bet, a "minus" (-) preceding the betting number indicates the team is a favorite. A "plus" (+) preceding the betting number indicates the team is an underdog. The team that you bet on must simply win the game, with a Money Line bet.

The Goal Spread (Puck Line): When betting on hockey, the team you bet on must "cover the spread." This means the team must win or not lose by a predetermined margin of goals.

Total: Total points scored in a game. Also called the Over/Under.

Hockey Parlays: You may combine several teams into one wager. All teams must win to win the bet. Hockey parlays are figured out by calculating the payout for the first game, based on the Money Line, then applying that amount to the next game and so forth.

Example: The Lightning are 1.5 goal favorites to win. The Lightning must win the game by at least two goals to be a winner. If you bet on the Panthers, you win your bet if:

- The Panthers win the game.
- The game ends in a tie.
- The Panthers lose the game by not more than 1 goal.

Bet #	Team	Money Line	Total	Total
401	Panthers	+180		+1.5 (-160)
402	Lightning	-220	5	-1.5 (+140)

The Lightning are -220 to win the game meaning you would wager \$22 to win \$10 on Tampa Bay. Florida is +180 to win outright meaning you would wager \$10 to win \$18.

Note: The bottom team is always listed as the home team unless otherwise specified. The goal line or puck line is used in conjunction with the point spread. If the Lightning win by 2 goals or more, a \$10 bet would win \$14 and return \$24. If the Panthers win, tie, or lose by one goal, a \$16 bet would win \$10 and return \$26.
